About

Hi, I'm Muazam Ali, a Full-Stack Developer who enjoys building responsive, user-friendly web applications that combine clean UI with scalable backend architecture. From developing modern frontend interfaces to creating secure REST APIs and authentication systems, I focus on delivering fast, reliable, and maintainable solutions. I'm passionate about writing clean code, optimizing performance, and continuously learning new technologies. Currently, I'm expanding my knowledge of cloud technologies and modern automated deployment workflows. I'm always open to connecting with developers, recruiters, and teams working on exciting web projects.

Experience

Intern MERN Stack Development - TecClubX (Faisalabad)

August 2026 - Present

MERN Stack Development Intern at TecClubX, building full-stack web applications with MongoDB, Express.js, React.js, and Node.js. Working on responsive frontend interfaces, REST API development, and database integration while collaborating with the development team on real-world projects. Focused on writing clean, maintainable code and learning modern development workflows.

Intern MERN Stack Development - Gamica Cloud

October 2026 - Present

Developed full-stack applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js). Created authentication systems using JWT and protected API routes. Built CRUD-based dashboards and dynamic frontend interfaces.

Projects

ORYX VPN Website

[Next.js 16](#), [React 19](#), [TypeScript](#), [Tailwind CSS](#), [NextAuth.js](#) | oryxvpn.com

Implemented the frontend and backend API integration for ORYX VPN's multilingual marketing site and user dashboard, built to the company designer's Figma specs. Developed the landing page, pricing with monthly/yearly toggles, download center, and full auth flows (signup/login, email verification, password reset) with NextAuth.js v5. Integrated modern payment gateways: Stripe billing and OxaPay crypto invoicing. Built the dashboard with subscription status, connected-device management and remote revoke, English/Persian/Turkish localization (next-intl), and dark/light mode. Handled advanced state and forms with React Hook Form, Zod schema validation, SWR, and Axios. Deployed October 2026.

SecureTap VPN Website

[Next.js 16](#), [React 19](#), [TypeScript](#), [Tailwind CSS v4](#), [HeroUI](#) | securetapvpn.com

Built the complete SecureTap VPN web platform. Integrated Webhook-based AI Chatbot widget supporting automated user query resolution and live human agent handoff. Integrated OxaPay crypto invoicing (BTC, USDT, ETH) for payments. Built interactive tools including a live "What Is My IP" checker and VPN protocol guides, a Markdown blog/SEO engine, cross-platform download center, and complete auth flows. Implemented multi-language support with a dynamic language switcher (next-intl) and translation API endpoint. Handled advanced state and forms with React Hook Form, Zod schema validation, SWR, and Axios.

Cybervol - Cybersecurity Platform

[Next.js 16](#), [React 19](#), [Tailwind CSS v4](#)

Developed a premium B2B enterprise cybersecurity and consulting platform. Built a services hub with dedicated pages for 6 core offerings (penetration testing, vulnerability assessment, threat detection, compliance, incident response) and industry solutions for FinTech, Healthcare, E-Commerce and corporate sectors. Created a resources hub with e-books, blogs, datasheets and webinars, plus an Elite VIP portal, company credentials page with ISO/SOC badges, and lead-generation consultation forms. Used modular component architecture with custom typography (Manrope, Sora) and dark-theme styling.

Vexo - Real-Time Chat & Media Platform

[Next.js 16](#), [React 19](#), [Node.js](#), [Socket.io](#), [Redis](#), [MongoDB](#), [Tailwind CSS v4](#)

Built a complete full-stack WhatsApp/Telegram-style chat platform, backend and frontend. Engineered a real-time messaging engine with Socket.io and Redis (online presence, typing indicators, read receipts) on a MongoDB/Mongoose backend. Integrated ZegoCloud WebRTC for HD voice/video calls, Hugging Face API for an in-chat AI assistant, and a Cheerio-based link preview scraper. Implemented OTP email verification (Nodemailer), Google OAuth, and PIN-protected chat lock. Rich client UX with Redux Toolkit, voice messages, live location sharing (React-Leaflet), status stories, group polls, and dark/light themes.

Headless E-Commerce Site

[Next.js](#)

Modern storefront concept built around flexible product data with a fast, minimal shopping experience.

Quiz Master

[React](#)

Interactive quiz application with varied categories, real-time scoring, and an engaging modern interface.

Medium Clone Blog

[Next.js](#), [Tailwind CSS](#)

Polished blog experience with a modern reading layout, hybrid content flow, and smooth UI interactions.

Expense Tracker

[JavaScript](#)

Personal finance app to monitor daily spending with clean charts and simple data entry.

Education

Board of Intermediate and Secondary Education (BISE), Faisalabad - Matric, Computer Science

August 2023 - September 2025

Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3

Frontend: Next.js 16 (App Router), React 19, Redux Toolkit, Tailwind CSS v4, HeroUI, Shadcn UI, Framer Motion, React Hook Form, Zod, Responsive Web Design, Mobile Web Design, User Interface Design, Front-End Development

Backend & Database: Node.js, Express.js, REST APIs, API Development, Socket.io (WebSockets), MongoDB & Mongoose, Redis (ioredis), Databases, Back-End Development

Auth, Payments & Integrations: NextAuth.js v5, JWT Authentication, Authentication Systems, Google OAuth, Nodemailer (OTP), Stripe Payments, OxaPay Crypto Invoicing, WebRTC / ZegoCloud SDK, Internationalization (next-intl), Cloudinary, Firebase Admin

Tools & Practices: Git & GitHub, Vercel, Postman, Figma to Code, MERN Stack, Full-Stack Development, Application Optimization, Dashboards
